**Scientific seminars led by lecturers take place every Thursday at 11.30 am.**

**NeuroHebdos** are presentations made by doctoral students from GIN. They take place on Tuesday at 1 pm.

"Vendredi matin de la neuro" ("Neuro Friday mornings") are organized by the clinical neuroscience team. These lectures take place on Friday mornings, from 8.30 to 9.30 am. Visual materials from previous lectures are downloadable on the "Vendredi matin de la neuro" blog.

These lectures are open to all, but due to their level of scientific specialization they are above all aimed at specialists in this field.
