

## Engineer position - Hydrogen based therapy for Parkinson Disease

We are seeking to recruit an engineer with a strong expertise in integrated neurosciences and pre-clinical research in the context of Parkinson's disease.

The engineer position is financed by an ANR PRCE grant titled "Hydrogen based therapy for Parkinson Disease" attributed to a consortium of expert researchers in biochemistry, neuroscience, electrochemistry with an industrial collaboration, the start-up The Element Biotechnology. The working place of the position is at the Grenoble Institute of Neurosciences (Grenoble, France) (<https://neurosciences.univ-grenoble-alpes.fr/fr>). The objective of the project is to investigate the effect of molecular hydrogen as a neuroprotective agent.

### Competences

For this position, we are seeking a highly motivated and competent individual with a good track record in either cell biology, PD rat models, behavioral evaluation, experiments on animal models, immunohistochemistry, Western blot, Elisa Kit.

Deadline: 30/12/2024.
